Computer Repair / Optimization & Upgrades

Computer running slow? Leavenworth Online's expert staff can make your older computer run like new! Upgrades are a cost effective way to stretch your technology budget, without compromising performance.

Most upgrades can be completed while you wait and can cost as little as $10!

Optimizing your computer is another simple and extremely effective way to speed up your computer. Old software, spyware, outdated drivers, and other misconfigurations can slow your computer down to a crawl. With our staffs expertise your computer will be running top notch in no time.

Please contact Leavenworth Online today for a customized and personal quote.
